

TLS350™

Excellent for sport and performance divers, this drysuit has set the industry standard for what divers have come to expect from a drysuit.

Durable, fast drying and lightweight for travel. The TLS350 is so versatile that it has become the primary choice for underwater photographers, deep cave explorers, and the US Coast Guard Helicopter Rescue Swimmers. By varying the insulation, you can use this suit in the warm waters of Florida and the ice-covered seas of Antarctica.

DUI Premium Drysuits set the bar for quality, performance, longevity and overall value. Made by hand with first class materials, craftsmanship and ZipSeals™.
